

PEI Sport, Recreation and Facilities Update
COVID-19 Announcements from Tuesday Dec 14 Briefing

Please note the following changes and updates to the Covid-19 protocols sporting groups, recreation activities and facilities must observe in the delivery of programs and activities. These updates come into play on Friday morning, December 17 at 8 am.

Sporting Groups, Teams and Recreational Activities

All of the current protocols must be observed with the following updates:

- No tournaments are allowed until further notice.
- Regularly scheduled games and activities among teams from PEI are permitted to continue with the following changes:
 - Organized sporting or recreational programs must be kept within 50 participants.
 - If the same team plays multiple games in a day as part of their regularly scheduled activities (example curling, minor sport jamboree), the total number of direct participants cannot exceed 50. If there are four teams together, each with 15 participants and each team only plays two of the other three teams, the total number of direct participants is 45 and not 60.
These activities must be part of already scheduled programs for sport and cannot be a tournament format.
 - Participants should only select one activity per day if they are involved in multiple programs (example: A person is involved in their school basketball team and are also a speed skater. That person should only attend one of those activities if both are scheduled on the same day)
- Teams are not permitted to travel to another province/territory for competition and teams from outside of PEI are not permitted to travel to PEI.

Sport and Recreational Facilities

All of the current protocols in place must be observed with the following updates:

- Organizers of activities to encourage the spectators to physically distance as much as possible based on the number of seats and size of the facility. All Vaxpass regulations are still in place.
- Organizers should be very vigilant in reminding participants and spectators to observe the masking protocols. Masks must be worn by participants until they are ready to do their activity and spectators the entire time they are in the facility. Mask should be properly fitted and cover the mouth and the nose.
- Any facilities that serve food should ensure that patrons eating the food are doing so at a seat (table or in the stands) and not doing so while standing against the glass or in an area where patrons are moving back and forth.

These updates will be revisited in early January

Let's continue to do our part to ensure participants and spectators are safe and can continue to enjoy sport and recreational activities.
