

RETURN TO HOCKEY 1/2 FAQ SHEET

TEAM PRACTICES

Team Practices of up to 20 consistent individuals are permitted as of Jan 31st. The only exceptions to this measure are as follows:

- Team Staff and Volunteers who can maintain physical distancing do not count towards the consistent "number of 20".
- When half-Ice boards are used to split up the ice surface for two groups. The maximum number on each half of the ice is 20 participants and the maximum number in the entire arena area (on-ice and in the stands) is 50 (Participants, Team Staff, Volunteers and Parents included in this stipulation. **See more info below (re: spectators).**)

PARTICIPANT LIMITATIONS

There are no specific restrictions on being on the ice more than once per day, however if participants are involved with a number of different groups, it is recommended that those participants limit the number of groups they are participating in.

This does not apply to Team Staff and/or Volunteers; however, it is required that they maintain physical distancing when interacting with their groups.

GAME PLAY / TOURNAMENTS & TRAVEL

Game play, tournaments and inter-provincial travel are not permitted for minor hockey at this time. Once Hockey PEI receives an indication on when game play will resume, more information will be distributed regarding an update to its season schedules, operations, and Provincial / Atlantic Championships.

*Further discussions to the abilities of its teams who do participate in inter-provincial league play to come.

We appreciate our members' patience on this matter.

SPECTATORS

Depending on your facility and association, spectators may be permitted so as long as they do not exceed a total number of 50 (Participants, Team Staff & Volunteers included).

Parents can assist younger participants to get ready for their activity so long as the following is observed:

- Parents must wear their mask at all times and physical distance as much as possible.
- To support physical distancing, facilities should allow for extra space by allocating additional change rooms (if possible) to larger teams or groups and consider staggering use if possible...(continued)

FAQ SHEET

SPECTATORS (CONT.)

- Vax pass requirements are still in place for those 19 years of age and older and for groups where there are participants who are both over and under 19 years of age.

As noted above, some associations may require the use of half-ice boards and split ice surfaces, which will affect their ability to host spectators.

Therefore, parents may or may not be permitted to stay and watch the team practice depending on its association and facilities operational needs.

Members can contact their local Minor Hockey Association for further details.

COVID-19 POSITIVE TEST SITUATION

If someone tests positive for COVID-19 on your team, they should let their appropriate team staff contact know and then have the participants work through the scenarios listed in the link below to determine what they are required to do and if they must isolate.
